

Thanks for the comments, Steve. I am adding Matt Knecht to this e-mail reply group. If possible, please keep him in the loop on everything.

Matt and I are working on comments and will get them to you as soon as possible.

Thanks, Tom.

Hi Ron,

thanks for sending these.

I assume a few of my questions may be answered when the work plan is drafted, but just so I know

You have a symbol for a "proposed boring location" will samples be collected there also? the other symbols clearly indicate that samples will be collected at the proposed location (i.e. "proposed surface soil sample" and "proposed boring and surface soil sample")

I assume analyte list will be in the text of the plan

On figure 6 there seems to be a rather large area without any locations just west of the "shelter house" and east of the "west pond" (labeled "grass and trees") is there a reason for this?

On Figure 5 -- same thing -- but it is the area of the "former concession stand"

Any plans to sample the sand inside the filter tanks?

How is the area where there is observable concrete dumping going to be assessed? Drilling hardly ever works in those areas and there are drums/old tank in the area. Excavating a trench for visual observation should be considered.

thats it for now based on what i have. --

Thanks,

---

Subject: Notification: Ron Roelker has sent you files

Ron Roelker has sent you 2 files using AECOM's File Transfer System.

Ron Roelker says:

Draft for review. USEPA, Ohio EPA and Bowlus&Bowlus have also been sent hard copies of the Draft VAP Phase I Report

These files will be available for download until 12/28/2012

<u>File</u>	<u>Description</u>	<u>Size</u>
<a href="#">FWP-DraftVAP-Phase I-122112.pdf</a>		36,333KB
<a href="#">FWP-ProposedSampleLocations-122112.pdf</a>		904KB
